

**What do I want to learn or understand better?**

I would like to learn more about how documentation is written in the best way since we will do that a lot the last weeks. I also would like to improve my skills in writing “good looking” code. Also keep on developing in coding.

**How can I help someone else, or the entire team, to learn something new?**

I can continue to contribute to learn how to work efficient. I also have improved a bit with XML and can learn the others about that. Also, to keep asking questions while coding and learn the others those skills in coding I have that they maybe can improve in.

**What is my contribution towards the team's use of Scrum?**

I have been attending every meeting and being active in the planning, sprint reviewing and writing team reflection.

**What is my contribution towards the team's deliveries?**

This week me and Klara have done the homepage of the app. We also started to create a function in the calendar where you can see every day's answer on one question when you pick a certain day.
