

What do I want to learn or understand better?

As the project is close to the end, I would like to learn how to finish things up. I would also like to know more about the documentation in coding. Also, how the Scrum routines is in the end of a project.

How can I help someone else, or the entire team, to learn something new?

I think I can learn the team more about efficiency in working and how to structure how to work in a team while writing a finishing rapport. I can learn them about my reflections in what I believe have and have not worked very well during our project as well.

What is my contribution towards the team's use of Scrum?

This week I have been Scrum Master, I hope I learned the others more about working efficient. I also wrote a big part of the Team Reflection. I attended the meetings and where active and gave my opinion in things we needed to discuss.

What is my contribution towards the team's deliveries?

This week I worked on the last functions in the calendar, which where that we needed the answer of question 14 to be seen there.
