

Individual Reflection-week 9

- What do I want to learn and understand better?

I want to learn more about Agile process and time planing, I want also to learn more about effort estimation and can be better at it. I also want to be better att programming specially in backend and learn how to use proper design patterns .

- How can I help someone else, or the entire team, to learn something new?

- I tried to be present and active on every meeting and trying to help the team to aim our goal. In our team we are very open to communicate and ask questions from each other if we need help and we help a lot each other.

- What is my contribution towards the teams Use of Scrum?

This week I contribute towards sprint-review, team reflection and Trello in our meetings.

- What is my contribution towards the teams deliveries?

I contributed toward the teams delivery by doing my task which was to connect save button to confirm page in Main activity and fix som design and even fix some bugs in Quiz activity.
