

Individual Reflections - Week 1

- What do I want to learn and understand better?

I want to learn and understand better how to work in an agile team and how to be more efficient in my team and help them to achieve our goal which is developing an app. I also want to understand better how to use Scrum methods in team and see how it can impact on our job.

- How can I help someone else, or the entire team, to learn something new?

I could contribute with my idea this week. I think helping each other can make a team to learn new things and helping the team to go forward.

- What is my contribution towards the team's Use of Scrum?

I can help my team by following scrum methods, like reflecting previous sprint and planning the next sprint and try to help my team to work better and go forward.

- What is my contribution towards the team's deliveries?

I could contribute with my idea about our project and feedbacks to other team members.
