

- **What do I want to learn or understand better?**

I want to continue my learning in the program Android Studio to get more practice in how to develop an app.

I would also like to get better understanding in how to create the team reflection in the best way to get the most of it.

- **How can I help someone else, or the entire team, to learn something new?**

This week has been a lot about working in Figma and Android Studios, and therefore it has been hard to help the other due to the fact that those programs is new to me.

Though I suggested that we will have a set meeting every Monday and this maybe can teach the others how to work in a more structured way.

- **What is my contribution towards the team's use of Scrum?**

I participated in the discussion about how we will decide a new scrum master each week. Also, in the discussion about how we will do with the product owner.

I participated in creating the user stories and the tasks, also in the DoD and acceptance criteria.

I executed my tasks and user stories for this week.

- **What is my contribution towards the team's deliveries?**

I did a pretty big part of the team reflection, as answering the questions and giving ideas on how to write it.

I also contributed to developing the information page in the app.

I participated in the most meetings and helped with ideas for our future and current work.

I helped developing the app design in Figma
