What do I want to learn or understand better?

I want to continue my learning in android studios. I also would like to learn all the admin stuff when it comes to working in JavaScript and other programming languages, like the documentation etc.

How can I help someone else, or the entire team, to learn something new?

I believe that I can help the others to learn how to work in a more structured and efficient way when having meetings, planning a sprint and creating a team reflection for example. It is actually hard to say what I can help the group with due to the fact that my programming skills is lacking in comparison with the rest.

What is my contribution towards the team's use of Scrum?

This week we structured our use of scrum with defining what the scrum master, project owner and the rests' role definition are each week. I also helped with the planning of this sprint and to structure the User stories and tasks.

What is my contribution towards the team's deliveries?

This week my contribution included to continue with the code for the information page in out app. I also attended the meetings and helped with the team reflection. Despite that I also made a new Mockup-page with a dairy that the app users can write in.
