What do I want to learn or understand better?
I would like to learn more about XML code and the functionalities of Android Studios. Also how to fix a graph in the app which is what I have been working on this week.

How can I help someone else, or the entire team, to learn something new?
I can help the others by explaining how I am fixing the functions I am working on and by that learn the others what I have learned.

What is my contribution towards the team's use of Scrum?
This week I had not the opportunity to be at all meetings unfortunately. The communication has been a lot better in the group which and that is something everyone in the group has helped with.

What is my contribution towards the team's deliveries?
I helped with doing some of the graphs in the app. I have not been at my best this week though so I am planning to do more next week.
